

FeedMAX Series Bulk Autoloaders

Overview

Streamfeeder's high capacity FeedMAX Series maximizes operator efficiency and reduces labor cost. Realize ROI in less than 4 weeks in many cases. Perfect for feeding envelopes, magazines, self-mailers, postcards, leaflets, flyers, folders and more.

FeedMAX is ideal for continuous feed applications. Create increased feeder capacity for long run jobs. Our adjustable product guide, patented Dynamic Rotation Technology™ and "Shaker" plate help increase product separation and improve alignment.

By aligning the FeedMAX at a right angle, you can create a U-shaped work station that allows a single operator to run an entire job without additional labor.

FeedMAX-S features a registration table.
