

# Flex Feeder

## Overview

Streamfeeder's Flex Feeder dispenses difficult to feed products that may be flexible, thin or flimsy, uneven or are not uniform in shape. Our Flex Feeder solves this challenge by efficiently shingling the product while supporting the entire piece through the feeder.

The Flex Feeder is ideal for operations in food and consumer goods packaging by automating product dispensing in applications including coding, labeling, ink jet printing, scanning, verification and more. A vacuum transport and optional shingling conveyor can be added to offer a complete system solution.

## Standard Features

- Adjustable feed belts
- Dual feed belts with soft and hard separator plates
- Casters, leveling feet
- Push button controls
- Variable speed control
- Product alignment guides

## Optional Features

- System integration with downstream machines

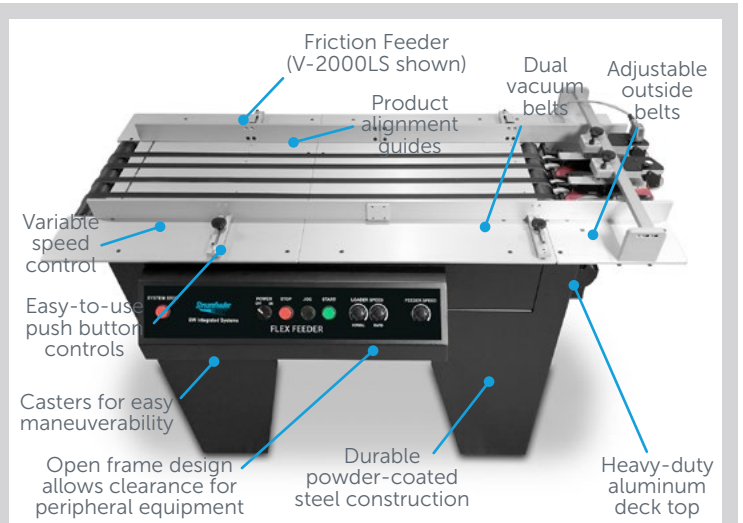

## Applications

- Addressing
- Attaching
