StreamNet Communications System

Overview

Streamfeeder developed StreamNet as a central control station for our collating systems to provide communication integration between the conveyor, feeders, and host systems such as shrink wrappers, flow wrappers, poly-baggers, cartoners and more. StreamNet is designed for operating at speeds up to 120 pockets per minute utilizing our feeders.

Standard Features

- Sequential Start/Stop
- Configurable Feeder Location
- System Diagnostics
- Host Interface
- Single Flight Sensor
- Line Synchronization
- Inter-pocket Adjustment
